## Практика 8

## **Recycle View**

Программа «Список книг»

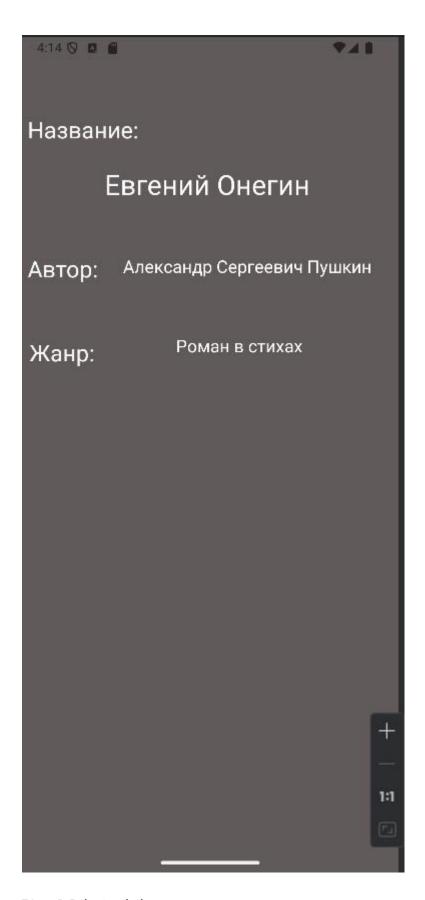

Список:

При нажатии на элемент списка переносимся на новую активность.

Код MainActivity

```
class MainActivity : AppCompatActivity() {
   private lateinit var newArrayList : ArrayList<DataClass>
   private lateinit var textId : Array<String>
   private lateinit var genreid: Array<String>
   private lateinit var MyAdapter: MyAdapter
   override fun onCreate(savedInstanceState: Bundle?) {
      super.onCreate(savedInstanceState)
      setContentView(R.layout.activity_main)
      val systemBars = insets.getInsets(WindowInsetsCompat.Type.systemBars())
          v.set Padding (system Bars.left, \ system Bars.top, \ system Bars.right, \ system Bars.bottom)\\
      imageid = arrayOf(
          R.drawable.book,
          R.drawable.book,
          R.drawable.book,
          R.drawable.book,
          R.drawable.book,
          R.drawable.book,
          R.drawable.book,
          R.drawable.book,
```

```
textId = resources.getStringArray(R.array.book)
    textAutId = resources.getStringArray(R.array.author)
    genreid = resources.getStringArray(R.array.genre)
    newRecycleView = findViewById(R.id.recycleView)
    newRecycleView.layoutManager = LinearLayoutManager( context: this)
    newRecycleView.setHasFixedSize(true)
    newArrayList = arrayListOf<DataClass>()
    getUserdata()
    MyAdapter = MyAdapter(newArrayList)
    newRecycleView.adapter = MyAdapter
    MyAdapter.onItemClick = {
        val intent = Intent( packageContext: this, item::class.jανα)
        intent.putExtra( name: "android", it)
        startActivity(intent)
private fun getUserdata() {
    for (i in imageid.indices)
        val data = DataClass(imageid[i], textId[i], textAutId[i], genreid[i])
        newArrayList.add(data)
    newRecycleView.adapter = MyAdapter(newArrayList)
```

## Код ItemActivity

```
class item : AppCompatActivity() {
       super.onCreate(savedInstanceState)
       enableEdgeToEdge()
       setContentView(R.layout.activity_item)
       val systemBars = insets.getInsets(WindowInsetsCompat.Type.systemBars())
          v.setPadding(systemBars.left, systemBars.top, systemBars.right, systemBars.bottom)
          insets
       val getData = intent.getParcelableExtra<DataClass>( name: "android")
       if (getData != null){
          val Book: TextView = findViewById(R.id.nameBook)
          val Author: TextView = findViewById(R.id.Authorname)
          val Genre: TextView = findViewById(R.id.genre)
          Book. text = getData. heading
          Author. text = getData.auttxt
          Genre.<u>text</u> = getData.<u>genretxt</u>
```

## **DataClass**

Адаптер:

```
lass MyAdapter (private val newList : ArrayList<DataClass>): RecyclerView.Adapter<MyAdapter.MyViewHolder>()
  override fun onCreateViewHolder(parent: ViewGroup, viewType: Int):
         MyViewHolder {
     val itemView =
         LayoutInflater.from(parent.context).inflate(R.layout.<u>list_item</u>,
            parent, attachToRoot: false)
     return MyViewHolder(itemView)
     holder. Image View. set Image Resource (curent Item. \underline{title Image})
     holder.txtBonk.<u>text</u> = curentItem.<u>auttxt</u>
         onItemClick?.invoke(curentItem)
  class MyViewHolder(itemView: View) : RecyclerView.ViewHolder(itemView) {
     val txtBonk : TextView = itemView.findViewById(R.id.txtAut)
         holder.itemView.setOnClickListener {
              onItemClick?.invoke(curentItem)
         }
    class MyViewHolder(itemView: View) : RecyclerView.ViewHolder(itemView) {
         val ImageView : ShapeableImageView =
              itemView.findViewById(R.id.imageItem)
         val txtHead : TextView = itemView.findViewById(R.id.txtItem)
         val txtBonk : TextView = itemView.findViewById(R.id.txtAut)
```
