Практика 12 Firebase

В проекте Firebase добавил двух пользователей.

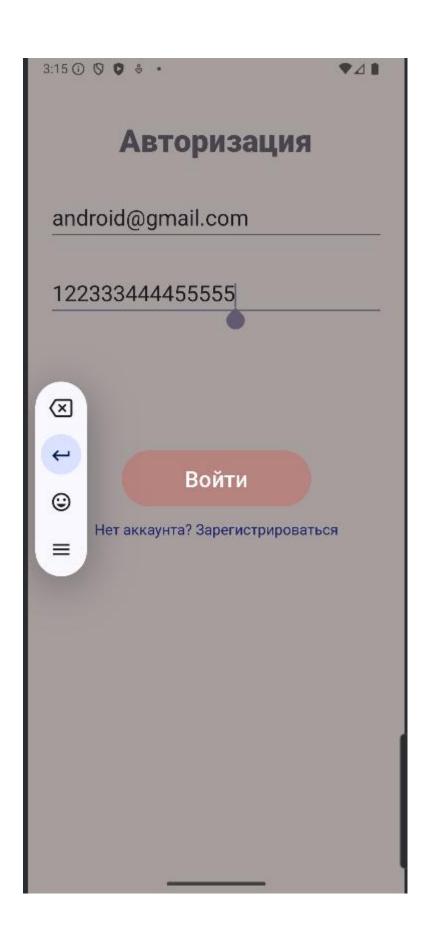

Создал Activity регистрации и успешно зарегистрировал новый аккаунт.

Создал активити с авторизацией и успешно вошёл в один из аккаунтов.

Код MainActivity:

```
class MainActivity : AppCompatActivity() {
 lateinit var etEmail: EditText
 lateinit var etConfPass: EditText
 private lateinit var etPass: EditText
private lateinit var btnSignUp: Button
 lateinit var tvRedirectLogin: TextView
private lateinit var auth: FirebaseAuth
 override fun onCreate(savedInstanceState: Bundle?) {
     super.onCreate(savedInstanceState)
     enableEdgeToEdge()
     setContentView(R.layout.activity_main)
     ViewCompat.setOnApplyWindowInsetsListener(findViewById(R.id.main)) {
         val systemBars =
              insets.getInsets(WindowInsetsCompat.Type.systemBars())
         v.setPadding(systemBars.left, systemBars.top, systemBars.right,
              systemBars.bottom)
         insets
     etEmail = findViewById(R.id.email)
     etConfPass = findViewById(R.id.confirm_password)
     etPass = findViewById(R.id.password)
     btnSignUp = findViewById(R.id.registr)
     tvRedirectLogin = findViewById(R.id.tvRedirectLogin)
     auth = Firebase.auth
     btnSignUp.setOnClickListener {
         singUpUser()
            startActivity(intent)
      private fun singUpUser() {
         if (pass != confPass) {
          auth.createUserWithEmailAndPassword(email.pass).addOnCompleteListener(this){
               Toast.makeText( context: this, text: "Регистрация успешна", Toast.LENGTH_SHORT).show()
             }else {
               Toast.makeText( context: this, text: "Ошибка регистрации", Toast.LENGTH_SHORT).show()
```

Код LoginActivity:

```
class LoginActivity : AppCompatActivity() {
 private lateinit var tvRedirectSignUp: TextView
 lateinit var auth: FirebaseAuth
     super.onCreate(savedInstanceState)
     enableEdgeToEdge()
     setContentView(R.layout.activity_login)
     ViewCompat.setOnApplyWindowInsetsListener(findViewById(R.id.main)) {
             v, insets ->
         val systemBars =
             insets.getInsets(WindowInsetsCompat.Type.systemBars())
         v.setPadding(systemBars.left, systemBars.top, systemBars.right,
             systemBars.bottom)
         insets
     tvRedirectSignUp = findViewById(R.id.tvRedirectRegistr)
     btnLogin = findViewById(R.id.login)
     etEmail = findViewById(R.id.email_login)
     etPass = findViewById(R.id.password_login)
     auth = FirebaseAuth.getInstance()
         login()
     tvRedirectSignUp.setOnClickListener {
         startActivity(intent)
  private fun login() {
       val email = etEmail.text.toString()
       val pass = etPass.text.toString()
       auth.signInWithEmailAndPassword(email, pass).addOnCompleteListener(this){
           if (it.isSuccessful) {
                Toast.makeText( context: this, text: "Вход успешен!",
                    Toast.LENGTH_SHORT).show()
                intent = Intent( packageContext: this, HomeActivity::class.java)
                startActivity(intent)
           } else
                Toast.makeText( context: this, text: "Ошибка входа ",
                    Toast.LENGTH_SHORT).show()
                                                                               🦺 Ножн
```
